

Supporting Your Child's Memory Skills – Free Online Event

Does your child often struggle to remember spellings, understand what they are reading or follow instructions? Would you like a better understanding of how your child's dyslexia affects their memory? And how you can support their memory skills?

Join Dyslexia Sparks' free online support session – **Thursday 11th November 10-11am** – for a special focus on memory and dyslexia.

Difficulties with short-term and working memory are a key feature of most dyslexic profiles. For many dyslexic children, this leads to struggles with remembering spellings; understanding what they're reading; retaining and following instructions; and remembering what equipment to take to school.

Led by Dyslexia Sparks' Founding Director, Jane Craig, the session will cover

- an overview of how memory difficulties impact dyslexic children
- an exploration of the type of activities we use in our specialist tuition
- how you can use these activities at home to help develop your child's memory skills.

This session will be of interest to parents / carers of children of any age, and schoolteachers wanting to gain an understanding of the impact of dyslexia on memory.

Places are free but limited and must be booked in advance. A recording of the session will be sent to all registered attendees so even if you are unable to join the meeting live, you can watch later at a time that is suitable for you. For further details and to book, please visit our [Eventbrite page](#) or contact us directly at nicola.markham@dyslexia-sparks.org.uk

Dyslexia Sparks is Hull and East Yorkshire's only registered charity for dyslexia and associated specific learning difficulties. The session is held as part of our free, monthly online parent support group which often features particular topics and guest speakers.
